Career Objective

Seeking an entry-level Cross-Platform Mobile App Developer opportunity to apply my knowledge of Flutter, Dart, Object-Oriented Programming (OOP), SQL, and software development fundamentals. Currently developing practical mobile applications through DEPI and ITI training programs. Eager to contribute to real-world projects, strengthen my technical skills, and grow as a professional software developer.

Training Experience

Digital Egypt Pioneers Initiative (DEPI)

Present

Cross-Platform Mobile App Developer – Flutter

Egypt

- Currently participating in the Cross-Platform Mobile App Developer track with a focus on Flutter and Dart.
- Developing practical cross-platform mobile applications using Flutter and Dart.
- Applying Object-Oriented Programming concepts, reusable code structures, and software development principles in mobile applications.
- Strengthening skills in user interface development, application logic, debugging, and mobile application development workflows.

Information Technology Institute (ITI)

Present

Cross-Platform Mobile App Developer – Flutter

Egypt

- Currently participating in a Cross-Platform Mobile App Development training program using Flutter and Dart.
- Building practical mobile application features while developing skills in Flutter application architecture and user interface implementation.
- Applying programming fundamentals and Object-Oriented Programming concepts to mobile application development.

Project Experience

Library Management System

- Developed a library management system as part of an Object-Oriented Programming (OOP) project.
- Applied core OOP concepts including classes, objects, inheritance, and encapsulation to structure the application.
- Implemented functionality for managing books, users, and core library operations.
- Applied structured programming principles to improve code organization, maintainability, and reusability.

Airline Ticket Reservation System

- Analyzed and designed a multi-branch airline ticket reservation system as part of a System Analysis and Design project.
- Designed a solution to reduce duplicate ticket bookings across different branches through centralized reservation management.
- Developed a prototype including user login and account registration using local data storage.
- Applied system analysis techniques to identify requirements, system processes, users, and data interactions.

Technical Skills

Programming Languages: Dart, C#, SQL

Mobile Development: Flutter, Cross-Platform Mobile App Development, Mobile UI Development

Programming Concepts: Object-Oriented Programming (OOP), Classes, Objects, Inheritance, Encapsulation

Databases: SQL, Database Fundamentals, Database Design, Local Data Storage

Software Engineering: System Analysis, System Design, Software Development Fundamentals, Problem Solving

Development Tools: Android Studio, Microsoft Word, Microsoft PowerPoint, Microsoft Excel (Basic)

Relevant Coursework

- Object-Oriented Programming (OOP)
- Data Structures & Algorithms
- Software Engineering
- System Analysis & Design
- Database Fundamentals
- Operating Systems
- Computer Networks

Education

El Shorouk Academy	2023–2027
<i>Bachelor's Degree in Computer Science</i>	<i>Cairo, Egypt</i>
– Expected Graduation: 2027	

Soft Skills

Problem Solving | Teamwork | Communication | Adaptability

Languages

Arabic: Native
English: Intermediate
